*Writing
Instruments*

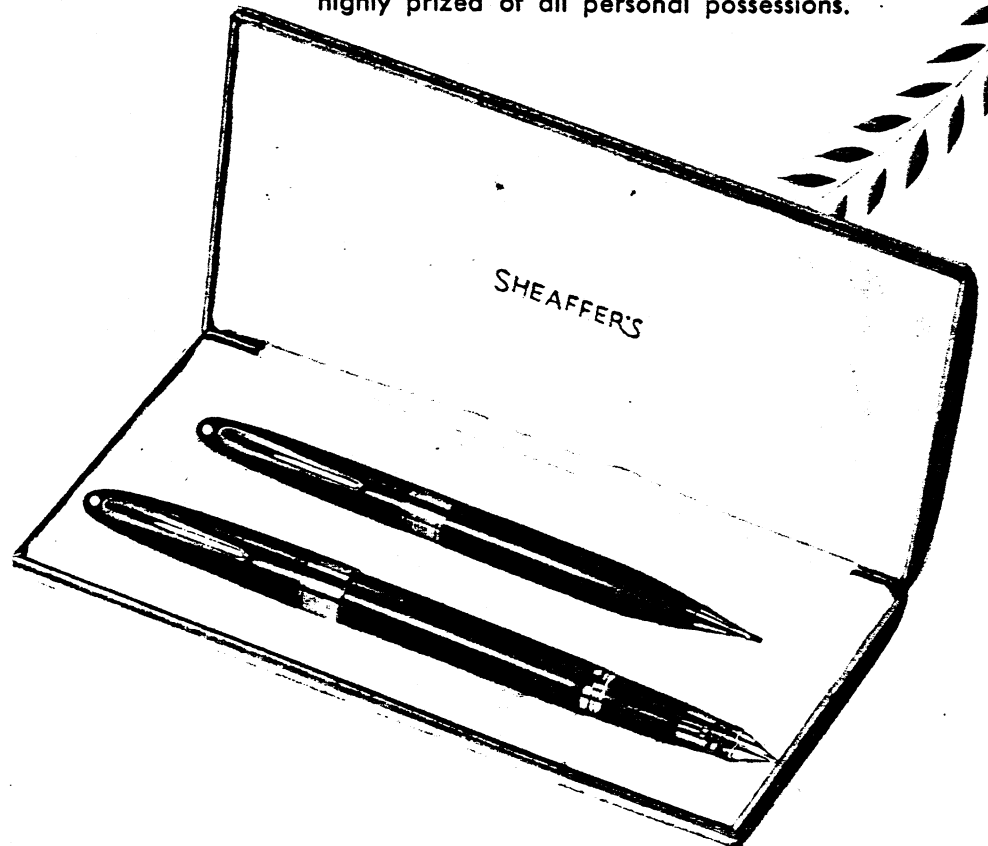

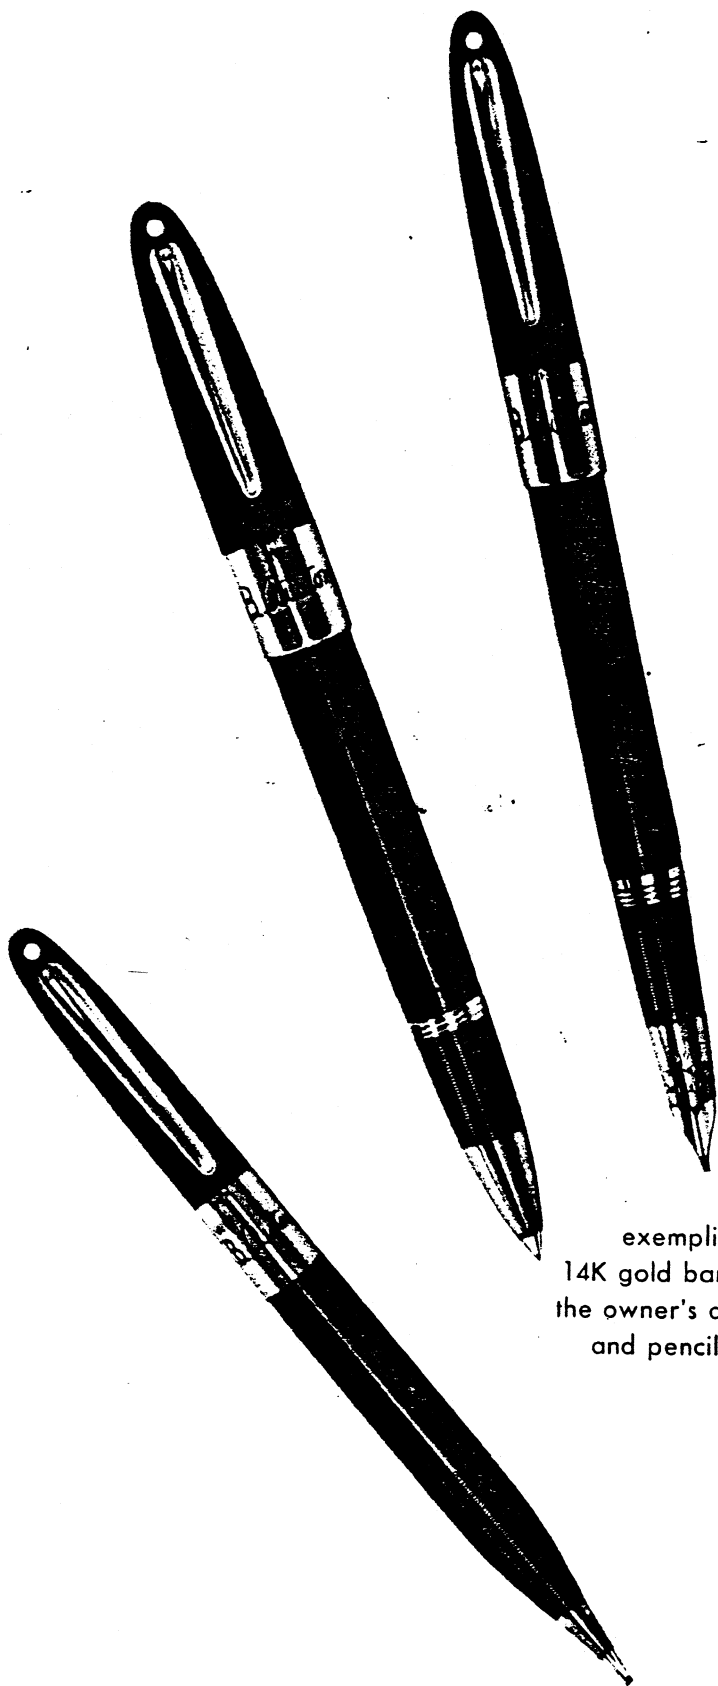

America's **FIRST** Choice

Beautifully boxed in sets
Sheaffer's make ideal gifts.

Sheaffer's writing instruments, purchased individually or in sets, are attractively packaged for presentation. Their enduring beauty and performance make them most highly prized of all personal possessions.

Sheaffer's

WITH *Autograph*

TM*

The richest possible combination of plastic and precious metal. In all the years of Sheaffer's existence this set has exemplified quiet elegance. The extra wide 14K gold bands are deeply hand engraved with the owner's autograph. Even the clips and pencil tip are 14K gold.

Pfff! it's filled

Sheaffer's Exclusive Pneumatic *TOUCH DOWN* One-stroke Filler...in all Sheaffer's Pens

Touchdown is Sheaffer's ingenious, air-operated filler that does away with pumping, priming or dismantling. One light down-stroke empties, cleans, refills completely, positively...to greater, longer-lasting capacity.

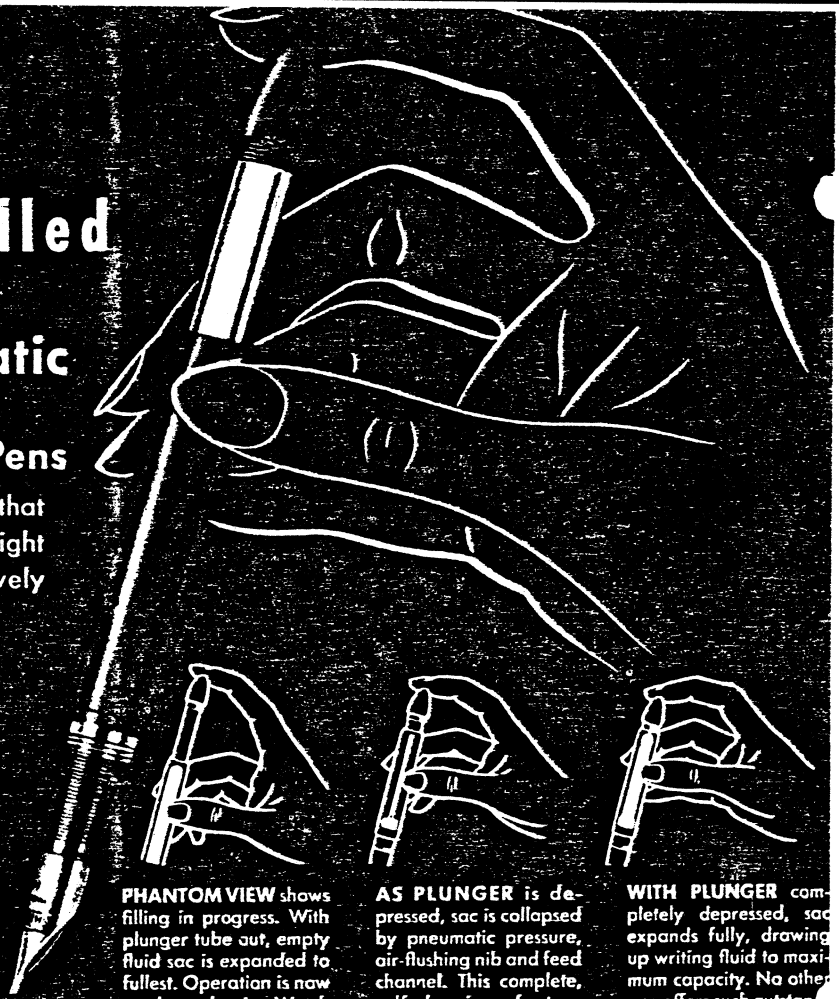

FINGER-TOUCH PLUNGER extended, pen is about to be dipped into writing fluid. Stop-watch is poised, ready to record actual time consumed in filling operation.

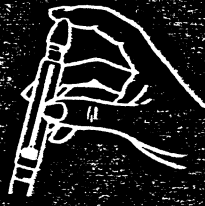

PEN TIP IMMERSSED in writing fluid, Touchdown plunger has been depressed into position in just one stroke. Merely count ten. No more effort is required on the part of the user.

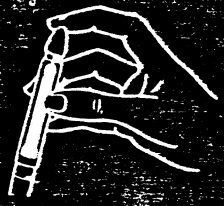

PEN COMPLETELY FULL, ready for use. Entire operation is compressed into ten seconds instead of several shaky minutes. No pen has ever filled so full, so quickly, so easily.

PHANTOM VIEW shows filling in progress. With plunger tube out, empty fluid sac is expanded to fullest. Operation is now ready to begin. Watch what happens in one single down-stroke.

AS PLUNGER is depressed, sac is collapsed by pneumatic pressure, air-flushing nib and feed channel. This complete, self-cleaning feature lengthens pen life, improves performance.

WITH PLUNGER completely depressed, sac expands fully, drawing up writing fluid to maximum capacity. No other pen offers such outstanding ease of operation, such positive action.

IMPROVED FEATHERTOUCH

GIANT 14K "TRIUMPH" NIB

The cylindrical construction of the "Triumph" nib is an engineer-proved principle that provides maximum strength. Sheaffer's patented feed controls the flow of fluid, prevents skips or leakage. Every Sheaffer's nib is made of 14K gold for enduring quality.

exclusive innerspring clip

A hidden, self-adjusting innerspring maintains strong tension against any fabric, thick or thin. Safest protection against loss, it will not tear any purse or pocket material. Won't spread or bend under any normal conditions.

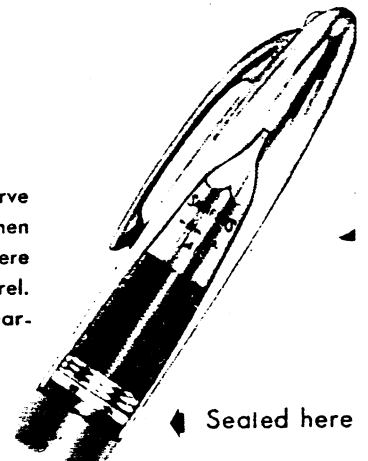

spiral grip

Sheaffer's writing instruments incorporate a special spiral grip which blends into the design and provides a firm finger surface. It reduces writing fatigue and improves penmanship by eliminating slipping.

air sealed cap

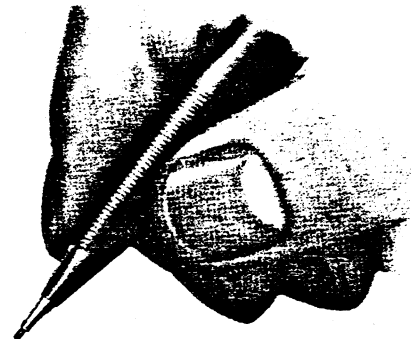

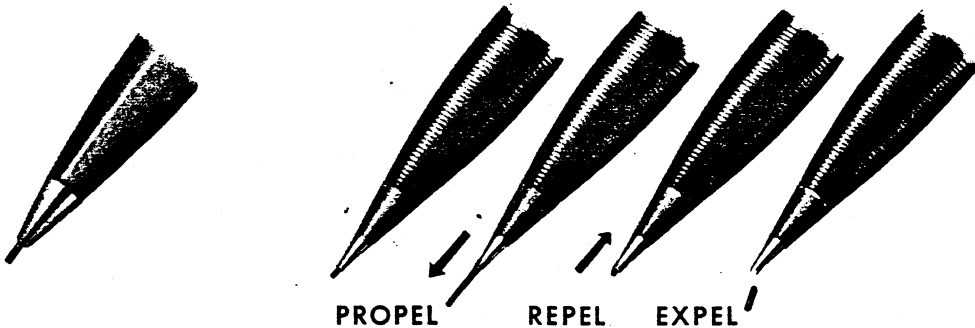

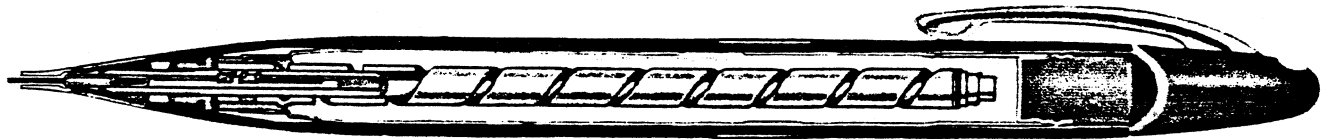

Threaded caps on Sheaffer's pens serve a dual purpose. Safety is assured when pen is carried in any position, since there is no wear or friction against the barrel. And the air seal prevents drying, guarantees instant writing.

THE INSIDE STORY OF SHEAFFER'S

Fineline Pencils

ORDINARY PENCIL TIP
Presents knife-sharp edge to lead surface. Cuts and weakens leads...causes frequent, annoying breakage.

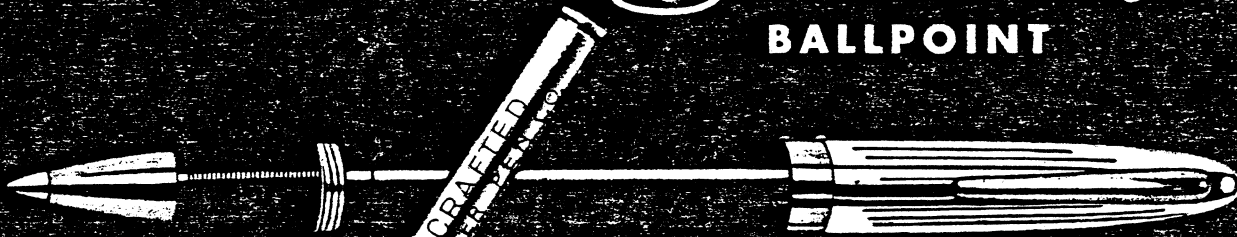

Exclusive sleeve-type tip increases supporting bearing surface 400%...decreases lead breakage, saving time and trouble.

Every Sheaffer's Pencil provides 'propel-repel-expel' action. Lead may be turned out, retracted, or completely ejected.

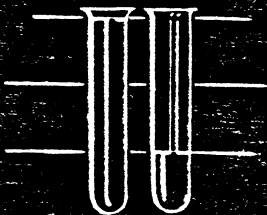

Spiral finger-grip relieves writing tension, makes every writing job far less tiring. Non-slip, easier to hold.

THE HEART OF SHEAFFER'S

Stratowriter BALLPOINT

Sheaffer's Stratowriters cannot be classed with ordinary ballpoints. Their precision-engineered "Micro-Crafted" replaceable units are the finest science and skill have ever created. Instant-starting, skip-free, each will write 3 to 5 times more than the average ballpoint unit. "Micro-Crafted" replacement units, \$1.00 list.

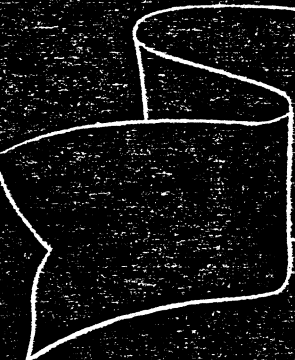

Actually 3 to 5 times more ink than the average replaceable cartridge.

Scientific Fadometer tests show that Sheaffer's royal blue Strato-ink remains legible even if exposed to daylight for ten years.

Exclusive feed eliminates skipping - spurting. Writes with lightest touch - or heaviest hand.

Safeguard combines the convenience of a fountain pen desk set with the utility of the reservoir type. Base holds many months' supply of writing fluid, automatically drawn, as-needed, by the pen itself—without clotting, clogging or corrosion. Yet, even if tipped not a drop of fluid is likely to escape! Ideal for offices, institutions, homes.

All safeguard bases available in black, brown, grey, green and maroon.

Safeguard Skrip comes in a specially-designed bottle to permit instant, clean refilling of the reservoir base without muss or bother. Fingers never touch fluid and the base holds the contents of a full bottle, making storage unnecessary. Safeguard Skrip—2 oz. bottle—15c.

Even when inverted, Safeguard fails to spill a drop of writing fluid. Yet it's constantly fed in measured amounts to the tip of the self-filling pen that draws up enough fluid to write a page or more.
